## PROJECTS

### 1)RoshDip-Agro

HTML, CSS, Javascript, PHP,MYSQL

- RoshDip farming will serve as a way for the farmers to sell their products cross the city just with some basic knowledge about how to use the website.
- The main objective of developing “RoshDip” website is to help farmers by providing all kinds agriculture related information in the website
- It helps farmers to improve their productivity and profitability. It enables farmers to sell their products online and farmers can purchase tools, seeds, fruit, etc. directly from seller.

### 2)Forms using VB.NET

- The feedback form is a way to collect opinions about your company services. The goal is to gain a better understanding of the overall customer experience so you can identify cross of improvement
- This is the feedback form in this I learned the the basic concepts of SQL functions and Database Connectivity in VB.net

### 3)Tour & Travel Website

- This project is created to help visitors book their dream vacation. This project is created using HTML, CSS and JAVASCRIPT and backend with MYSQL database
